## EXECUTIVE SUMMARY

I am an experienced designer who has worked in different posts before, like Graphic Designer, Multimedia Designer and Web Designer. The first company I worked for was an Advertising company in Hong Kong. I learnt a lot basic knowledge from this work in the almost 9 year work time, from Graphic Design, Web Design and Development, Animation, and Video editing. Moreover, the second company was a corporate in medical business in Hong Kong, and I have learnt the substantial design experience for a large scale company group. Furthermore, my latest work position was a Web Designer which provide me a chance to work with the web technology on the Front-end part.

In 2012, I have gotten the Bachelor Degree of BSc (Hons) Creative Technologies by Coventry University (jointly run with School for Higher and Professional Education), which covers usability, new media design content, such as mobile application development, video editing, 3D animation, and marketing of creative business. Besides, my final year project is an Android action game which can be viewed in my portfolio website, and I also learnt Android game development in Professional Diploma in Game Design & Production course in 2010-2011.

Lately I am keen on mobile application and game production. Moreover, I am also intereted in any kind of 3D animation, I had studied some part time courses of 3D animation held by City University of Hong Kong. Besides, I had also did freelance with web development, 3D artwork also.
